## **STERIL-AIRE RELEASES THE ALL NEW UVC CONTROLLER II: MORE FEATURES AND FUNCTIONALITY AT NO ADDITIONAL COST**

The Steril-Aire UVC Controller II is designed to enhance your installation by providing additional capabilities to your chosen UVC solution.

The UVC Controller II comes with an LCD Backlit Status Display that provides such information as: Lamp Life countdown, On/Off Status, Amp Draw, and alerts when the Emitters need attention or changeout.

The Controller is factory assembled and tested. It is secured in a type 4X (NEMA 4X) durable polycarbonate enclosure; Is a UL Approved 508A Industrial Controller for the United States and Canada; and has multiple power options.

The front mounted on/off buttons are vandalism proof, IP67 water proof and display red/green LED status. The Controller communicates with an optional door switch to prevent accidental exposure to UVC lights and has easy access for wiring to BMS contacts.

Does your facility run a BMS? The Steril-Aire UVC Controller II also comes with connections that can allow your BMS to remote start/stop the unit. It can also monitor loss of power, open doors, powered off Emitters, Emitter changeouts and Emitter faults.

Steril-Aire has been able to bring all this additional functionality without raising the price from the original UVC Controller launched in 2017.

###

Steril-Aire, ISO Certified in both 9001:2015 & 14001:2015, launched UVC for HVAC industry in 1994 and remains the leader today. Steril-Aire is the unrivaled leader in the development of high performance UVC solutions for air and surface decontamination.
